CURRICULUM VITAE

Tim Lichtenberg

Assistant Professor | Kapteyn Astronomical Institute | University of Groningen

tim.lichtenberg@rug.nl formingworlds.space rug.nl/staff/tim.lichtenberg

I study the physical and chemical processes that drive the growth and long-term evolution of rocky planets and exoplanets, from formation through billions of years of geodynamic and climate evolution. My research traces how radioactive heating and planetesimal differentiation set the initial volatile budgets, how magma ocean epochs forge the first atmospheres, and how mantle dynamics and volatile cycling shape planetary environments over geological time. By bridging planetary physics, geochemistry, and exoplanet observations, my research group works to understand the conditions for the origins of life and its cosmic prevalence.

Research Positions

Tenure Track Assistant Professor & Branco Weiss Fellow (University of Groningen, NL) 10/2022–

Simons Collaboration on the Origins of Life Postdoctoral Fellow (University of Oxford, UK) 10/19–09/22

Swiss National Science Foundation Early.Postdoc Mobility Fellow (University of Oxford, UK) 08/18–09/19

Education

Dr. sc. ETH Zurich (Department of Earth Sciences, ETH Zurich, Switzerland) 09/14–07/18

Thesis: Thermal Evolution of Forming Planets: Isotope Enrichment, Differentiation & Volatile Retention

Master of Science Physics (Georg-August-Universität Göttingen, Germany) 09/12–08/14

Thesis: Modeling gravitational instabilities in compact and massive protoplanetary disks with adaptive mesh refinement techniques (grade: 1.0)

Semester abroad (Peking University, People's Republic of China) 09/12–01/13

Studies of Chinese language and culture

Bachelor of Science Physics (Georg-August-Universität Göttingen, Germany) 09/09–08/12

Thesis: Constraining Exoplanet Characteristics with Asteroseismology (grade: 1.0)

Abitur 08, Wilhelmsgymnasium Kassel; military service 08–09, Schwarzenborn/Germany –09

Honours & Awards

Europlanet Early-Career Medal, Europlanet Society 09/25

Planetary and Solar System Sciences Division Outstanding Early Career Scientist Award, European Geosciences Union (EGU) 04/23

Winton Award for Early Achievement in Geophysics, Royal Astronomical Society 01/22

Doctoral Thesis Award 2019, German Astronomical Society 09/19

PhD Prize for Planetary Systems and Astrobiology 2018, International Astronomical Union 06/19

European Astrobiology Network Association, Horneck-Brack Presentation Award, 2nd prize 09/18

'Dr. Berliner - Dr. Ungewitter' award for M.Sc. thesis, Georg-August-Universität Göttingen 12/14

Master's diploma awarded 'with distinction', Georg-August-Universität Göttingen 08/14

Grants & Fellowships

19 grants and fellowships in total, incl. 12 as PI (>€2.5M), 4 as Co-I

Computing Time on National Computer Facilities, Small Compute grant EINF-19723 (535'000 SBU on the Snellius supercomputer, 50'000 CPU hours on the SURF Research Cloud, *Pilot for the Interra Project exoplanet simulation ensemble on Snellius*), Dutch Research Council (NWO) & SURF, PI 09/26

Conference support grants for Rocky Worlds IV in 01/26, Dutch Research Council (NWO), SRON, Netherlands Platform for Planetary Science, Leids Kerkhoven-Bosscha Fonds, PI 2025

AEThER Collaboration, Sloan Foundation, Co-I 07/25

European Research Council's (ERC) Starting Grant MagmaWorlds (€1.5M), PI 09/25

Computing Time on National Computer Facilities, Small Compute grant EINF-12464 (20'000 SBU on the Snellius supercomputer, *PROTEUS: An Adaptive Numerical Framework to Simulate Lava Exoplanets*), Dutch Research Council (NWO) & SURF, PI 01/25

Dutch Research Council (NWO) Consortium Grant (€329'065 out of €6.7M in total, *PRELIFE - Pathways, Reactions, and Environments leading to LIFE*), work package leader, Co-I 11/24

NOVA Consortium Grant (LIFE: Mid-infrared detection of biosignatures in the atmospheres of terrestrial exoplanets), PI: van der Tak (fte + cash € 249'000), Co-I 07/24

Open eScience Early Career Project PROTEUS (€134'000, *An Adaptive Numerical Framework to Simulate Lava Exoplanets*), Netherlands eScience Center, PI 12/23

Workshop grant for Rocky Worlds Discussions ($2'000), Meteoritical Society 02/23

Faculty Research Grant, Faculty of Science and Engineering (€150'000), University of Groningen, PI 12/22

Research Fellowship of the Branco Weiss Foundation (*CHF 500'000, Molten Exoplanets as a Window into the Earliest Earth*), PI 08/22

A-rated ERC Starting Grant Proposal (reserve list), European Research Council 06/22

Conference support grants for Rocky Worlds II in 07/22 (£8'000 + $5'000), Royal Astronomical Society, The Meteoritical Society, Kavli Institute for Cosmology, PI 05/21

Non-stipendiary Junior Research Fellowship, St Cross College, University of Oxford, PI 06/19

Simons Collaboration on the Origins of Life Postdoctoral Fellowship ($276'000, *Geodynamic Regimes during Planetogenesis*), Simons Foundation, PI 12/18

Bernoulli postdoctoral fellowship (not started), University of Oxford & University of Bern 03/18

Early Postdoc.Mobility fellowship (*CHF 77'650, Linking Interior-Atmosphere Regimes to Planetary Accretion*), Swiss National Science Foundation, PI 12/17

Conference support grant for Water during planet formation and evolution in 02/18 (*CHF 10'000*), University of Zurich Graduate Campus, Co-I 04/17

MERAC Funding and Travel Award (*CHF 5'000*), Swiss Society for Astrophysics & Astronomy, PI 10/16

Publications

Research-ID links: ORCID · Google Scholar · ADS · SciX · Scopus · arXiv

84 articles in total, incl. 16 first-author, 1 single-author, 22 co-/supervised student papers, 8 mentored postdoc papers†*
As first author 2x Science, 1x Nature Astronomy, 3x ApJL, 1x E&PSL

Postdoc Mentoring

4 mentored postdocs in total, incl. 3 with personal fellowships (2 SNSF, 1 JSPS), 1 ERC-funded

Patrick Bos, Senior Research Software Engineer (ERC Starting Grant *MagmaWorlds*), Kapteyn Institute 03/26–
Mara Attia, SNSF Postdoctoral Fellow, Kapteyn Institute 05/25–
Tadahiro Kimura, JSPS Postdoctoral Fellow, Kapteyn Institute 06/24–03/26
Rob Spaargaren, SNSF Postdoctoral Fellow, Kapteyn Institute 12/23–11/25

Student Mentoring

43 supervised students in total, incl. 7 PhD, 10 MSc, 16 BSc theses, 10 projects/internships

Visiting PhD research project "Impact re-triggering of protoplanet magma oceans", Anna Grace Ulses (University of Washington, Seattle), Kapteyn Institute 05/26–
PhD thesis "Prebiotic climate and ocean levels of the Hadean Earth", Emeline Decocq, Kapteyn Institute 09/25–
PhD thesis "Interior-atmosphere evolution on low-mass exoplanets", Imre Kisvárdai, Kapteyn Institute 09/25–
MSc thesis "Ocean formation on sub-Neptune exoplanets", Ema Jungová, Kapteyn Institute 09/25–
Internship & MSc thesis "UV flux of prebiotic atmospheres at varying redox conditions", Bruna Fena (FU Berlin MSc student), Kapteyn Institute 04/25–
MSc thesis "Probing abiotic planetary oxygenation with LIFE", Sanne Borgmann, Kapteyn Institute 01/25–
PhD thesis "Evolution of magma ocean exoplanet atmospheres", Emma Postolec, Kapteyn Institute 10/23–
PhD thesis "Evolution of magma ocean exoplanet interiors", Mariana V. Sastre, Kapteyn Institute 09/23–

BSc thesis "Radiation-recombination-limited hydrodynamic escape: conditions for limiting atmospheric escape on sub-Neptunes and super-Earths" (co-supervised with Mara Attia), Malina Ovesen, Kapteyn Institute 04/26–07/26

BSc thesis "The influence of atmospheric composition and photodissociation on Jeans escape from exoplanets" (co-supervised with Mara Attia), Ioana Balint, Kapteyn Institute 04/26–07/26

BSc thesis "Impact-driven Atmospheric Escape for Various Impactor Sizes and Size Distributions" (co-supervised with Mara Attia), Renske Beuker, Kapteyn Institute 04/26–08/26

BSc thesis "Diffusion-limited atmospheric escape of hydrogen from exoplanets" (co-supervised with Mara Attia), Viesturs Streļčs, Kapteyn Institute 04/26–07/26

MSc thesis "Developing an optimal observational strategy for ultra-short period super-Earths with the Ariel survey", Lorenzo Cesario, Kapteyn Institute 09/25–07/26

MSc thesis "Sulfur Photochemistry in the Coupling between Interior Properties and Atmospheric Compositions of Hot Rocky Exoplanets", Ioannis Panagiotou, Kapteyn Institute 09/25–07/26

BSc thesis "Tidally supported Hadean Magma Oceans under Secondary Atmospheres: Implications for the Production of Life's Building Blocks" & further research projects, Marijn van Dijk, Kapteyn Institute 04/25–07/25

BSc thesis "Timescale of ocean formation and their composition on Earth-like exoplanets", Anvel de Sainte Marie d'Agneaux, Kapteyn Institute 04/25–07/25

BSc thesis "Modelling the Interior Structure of Rocky Exoplanets with Zalmoxis", Flavia Pascal, Kapteyn Institute 04/25–07/25

BSc thesis "The Cosmic Shoreline: Modelling Bare-rock Surfaces and Atmospheres on Rocky M-dwarf Exoplanets" & further research projects, Karen Stuitje, RUG Physics department 04/25–07/25

MSc thesis "The Efficiency of Single-mode Fibers for Spatial Filtering as Part of the Optical Design for the Large Interferometer For Exoplanets" (co-supervised with Joost van den Born), Mariëlle Wortelboer, Kapteyn Institute 02/25–08/25

BSc Honours College research project "Exoplanet interior structure modelling", Flavia Pascal, Kapteyn Institute 01/25–04/25

MSc thesis "Forging Planets: Exploring the Magma Ocean Geochemistry of super-Earths and sub-Neptunes", Jorick Lania, Kapteyn Institute 10/24–07/25

BSc thesis "The under-dense region between super-Earths and sub-Neptunes", Jessica Helmerhorst, Kapteyn Institute 04/24–07/24

BSc thesis "Rock-vapour species in lava exoplanet atmospheres", Björn Koops, Kapteyn Institute 04/24–07/24

BSc thesis "Redox-dependency of the runaway greenhouse limit", Iris Boer, Kapteyn Institute 04/24–07/24

BSc semester project "Characterising exoplanet surface composition with LIFE", Flavia Pascal, Kapteyn Institute 11/23–06/24

MSc thesis "Magma oceanography of GJ 367b", Lotte Bartels, Kapteyn Institute 10/23–06/24

Undergraduate research project "Finding terrestrial protoplanets in the galactic neighbourhood", Lorenzo Cesario, Kapteyn Institute 09/23–06/24

PhD thesis "What happened to rocky planets?", Harrison Nicholls, Oxford Atmospheric Physics, co-supervisor 04/23–01/26

PhD research project "Fluid flow in aqueous planetesimals", Beat Hubmann, Kapteyn Institute 04/23–01/24

BSc thesis "Distinguishing surface features on rocky exoplanets", Lucas Priolet, Kapteyn Institute 04/23–07/23

BSc thesis "The prevalence of steam atmospheres on hot rocky exoplanets", Boyd van der Plaat, Kapteyn Institute 04/23–07/23

BSc thesis "Detecting Cooling Protoplanets with Next-Generation Surveys", Lorenzo Cesario, Kapteyn Institute 04/23–07/23

BSc thesis "Volcanic climate change on hot terrestrial exoplanets", Marijn Smorenburg, Kapteyn Institute 04/23–07/23

MSc thesis "Hydrology of Planetesimals", Beat Hubmann, Institute of Geophysics, ETH Zurich, co-supervision 02/22–10/22

Semester project "Investigating the surface composition of airless, terrestrial exoplanets with the Large Interferometer for Exoplanets", Gustav Pap, ETH Zurich, co-supervision 02/21–06/21

PhD research projects "A multispecies pseudoadiabat for simulating condensable-rich exoplanet atmospheres", Robert J. Graham, Oxford Atmospheric Physics, co-supervision 08/20–09/22

PhD research projects "Interior dynamics of tidally locked super-Earths", Tobias G. Meier, University of Bern, co-supervision 06/20–09/22

PhD research project "Beyond runaway: initiation of the post-runaway greenhouse state on rocky exoplanets", Ryan Boukrouche, Oxford Atmospheric Physics, co-supervision 01/20–09/22

Pastoral support and mentoring for 16 Oxford M.Sc. and D.Phil. (Ph.D.) students from the natural sciences (Engineering, Computer Science, Medicine, Physics, Chemistry), St Cross College, University of Oxford 10/19–09/22

Semester project "Influence of silicate rheology on iron core formation", Madeleine Müller, Institute of Geophysics, ETH Zurich, co-supervision 03/20–06/20

BSc thesis "Percolative core formation in terrestrial planetesimals and protoplanets", Madeleine Müller, Institute of Geophysics, ETH Zurich, co-supervision 12/18–06/19

MSc thesis "Quantitative Predictions for the Observability of Protoplanetary Collisions", Irene Bonati, Institute of Geophysics, ETH Zurich, co-supervision 12/16–09/17

Semester project "2D Numerical Modeling of Pebble Accretion Influence on Planetesimal Evolution", Fabio Luchsinger, Institute of Geophysics, ETH Zurich, co-supervision 08/16–02/17

Lectures and Courses

17 courses in total, incl. 11 as lecturer, 6 as teaching/lab assistant

Planetary Systems, BSc course, Kapteyn Institute, lecturer (∼40 students) 09/26–11/26

Exoplanets, MSc course, Kapteyn Institute, lecturer (∼20 students) 02/26–04/26

Planetary Systems, BSc course, Kapteyn Institute, lecturer (∼50 students) 09/25–11/25

Exoplanets, MSc course, Kapteyn Institute, lecturer (∼20 students) 10/24–02/25

Star and Planet Formation, MSc course, Kapteyn Institute, co-lecturer (∼30 students) 02/25–04/25

Exoplanets, MSc course, Kapteyn Institute, lecturer (∼20 students) 10/23–02/24

Hands-on Numerical Astrophysics School for Planet Formation Sciences, summer school, DFG priority programme 1992 "Exoplanet Diversity", Rauenberg, lecturer (∼30 students) 08/23

Star and Planet Formation, MSc course, Kapteyn Institute, co-lecturer (∼30 students) 02/23–04/23

Life and Information, BSc seminar, University of Groningen, guest lecturer (∼30 students) 11/22

Origin and role of volatiles in the early solar system and planets, block course, University of Bayreuth, lecturer (∼20 students) 01/20

Planetary Physics and Chemistry & *Geophysics II*, ETH Zurich, substitute lecturer (∼50 students) 09/17–05/18

Physics I as minor subject, ETH Zurich, exercise/exam design (∼100 students) 09/15–02/16

Physics I+II as minor subject, ETH Zurich, teaching assistant (∼30 students) 02/14–02/15

Scientific computing, Göttingen University, teaching assistant (∼20 students) 09/13–02/14

Basic physics lab course, Göttingen University, lab assistant (∼10 students) 09/13–02/14

Introduction to Astro- and Geophysics, Göttingen University, teaching assistant (∼20 students) 03/13–08/13

Basic physics lab course, Göttingen University, lab assistant (∼10 students) 09/12–02/13

External/Co-Examination & Defence Committees

24 examinations in total, incl. 7 PhD, 2 MSc, 15 BSc

Robin Malaca, "Damping Oscillations in Non-LTE Models", BSc thesis, supervisor: Floris van der Tak, University of Groningen, NL 07/26

Mariasole De Amicis, "The Atmospheric Composition of WASP-39b: A Broad-Wavelength Band Analysis with JWST", BSc thesis, supervisor: Quentin Changeat, University of Groningen, NL 07/26

Anastasia Perrotta, "Revisiting the target selection metric for the Ariel telescope", BSc thesis, supervisor: Quentin Changeat, University of Groningen, NL 07/26

Wout Sijtsma, "Testing the validity of the Shallow Water Equations in Hot Jupiter modeling using the pseudo-spectral PDE solver Dedalus 3", BSc thesis, supervisor: Quentin Changeat, University of Groningen, NL 07/26

Sacha Veenstra, "Thermal dissociation and atmospheric structure: how do they affect the retrieved atmospheric composition of the ultra-hot Jupiter WASP-18b?", BSc thesis, supervisor: Quentin Changeat, University of Groningen, NL 07/26

Aditya Arabhavi, "Unraveling the Planet-Forming Materials Around Young Stars with JWST", PhD thesis, supervisor: Inga Kamp, University of Groningen, NL 09/25

Zalán Novák, “Rotational Excitation of Interstellar OCS: Non-LTE Line Analysis and Temperature-Density Diagnostics Using RADEX”, BSc thesis, supervisor: Floris van der Tak, University of Groningen, NL 07/25

Emma F. van der Vinne, “Atmospheric retrieval of Jupiter, observed as an exoplanet, using the TauREx code”, BSc thesis, supervisor: Quentin Changeat, University of Groningen, NL 07/25

Tristan Popken, “Accelerated chemistry for exoplanet atmospheres via grid interpolation”, BSc thesis, supervisor: Quentin Changeat, University of Groningen, NL 07/25

Fran Štimac, “Unreliable Pixel Correction in JWST Exoplanet Data: Identifying, classifying, and correcting for unreliable pixels on the NIRSpec detector”, BSc thesis, supervisor: Quentin Changeat, University of Groningen, NL 07/25

Jesse Reurink, “A Small Population Study Across the Radius Valley using JWST NIRSpec G395H”, MSc thesis, supervisor: Quentin Changeat, University of Groningen, NL 07/25

Mark Oosterloo, “Tracking CHNOS during the early stages of planet formation with a model-laboratory approach”, PhD thesis, supervisors: Inga Kamp, Wim van Westrenen, University of Groningen, NL 01/25

Francisco Ardévol Martinez, “Machine learning for exoplanet characterisation in the JWST era”, PhD thesis, supervisors: Inga Kamp, Paul I. Palmer, Michiel Min, University of Groningen, NL 10/24

Zara Siyal, “Comparison and characterisation of properties of exoplanets and their host stars”, BSc thesis, supervisors: Amina Helmi, Tom Callingham, University of Groningen, NL 07/24

Tycho Hebels, “The Effects of Dust Grain Surface Reactions on the HDO/H_2O Ice Ratio in Protoplanetary Disks”, BSc thesis, supervisor: Inga Kamp, University of Groningen, NL 07/24

Kevin de Man, “Radiation processing of grains in protoplanetary disks”, BSc thesis, supervisor: Inga Kamp, University of Groningen, NL 07/24

Ioannis Panagiotou, “Evolution of the pressure equilibrium and condensation in idealised simulations”, BSc thesis, supervisors: Filippo Fraternali, A. Dutta, University of Groningen, NL 07/24

Keavin Moore, “Coupled Models of Water on Terrestrial Planets Orbiting M-Dwarfs”, PhD thesis, supervisor: Nicolas B. Cowan, McGill University, CA 12/23

Roos H. Voorhoeve, “Enhancing and expanding the applicability of ReverseRADEX for accurate astrophysical insights”, BSc thesis, supervisor: Floris van der Tak, University of Groningen, NL 12/23

Bayron Armando Portilla Revelo, “Closing the gap between theory and observations of planet-forming disks with radiative transfer models”, PhD thesis, supervisors: Inga Kamp, Ewine van Dishoeck, University of Groningen, NL 12/23

Nynke Visser, “The influence of the ice-albedo feedback on the long term carbon cycle of Earth-like exoplanets”, MSc thesis, supervisors: Inga Kamp, Mark Oosterloo, Dennis Höning, University of Groningen, NL 08/23

Raymon P. Ferdinand, “Outgassing and Exoplanet Atmospheres: A study of the effects of outgassing on the temperature and composition of the secondary atmospheres of rocky exoplanets”, BSc thesis, supervisors: Floris van der Tak, Michiel Min, University of Groningen, NL 06/23

Yapeng Zhang, “Isotopes and the characterization of extrasolar planets”, PhD thesis, supervisors: Ignas Snellen, Laura Kreidberg, Leiden Observatory, NL 06/23

Mantas Zilinskas, “Lava Worlds: Characterising atmospheres of impossible nature”, PhD thesis, supervisors: Yamila Miguel, Ignas Snellen, Leiden Observatory, NL 05/23

Astrobiology Science Officer, EGU Planetary and Solar System Sciences Division 06/23–05/25

National & International Collaborations

4 observing programmes with 268.3 hr of telescope time, incl. 1 as PI; member of 9 consortia and research programmes

TELESCOPE TIME

INT/HARPS3 Semester 26B, SI2026b03: *High-Precision RVs for an Expanded Census of Stellar and Planetary Compositions* (62.2 hr), PI — 07/26–

INT/HARPS3 Semester 26B, SI2026b01: *HARPS3-NEAR: A Radial-Velocity Census of the Nearest Sun-like Stars* (61.5 hr), PI: Snellen, Co-I — 07/26–

JWST Cycle 4, GO 8864: *Surveying Hellish Worlds: Lava Planets as Time Capsules of Thermal Evolution* (100.4 hr), PI: Dang, Co-I — 04/25–

JWST Cycle 2, GO 3860: *Phase Curve Observations of TOI-561 b To Study Atmosphere-Interior Exchange* (44.2 hr), PI: Teske, Co-I — 02/23–

CONSORTIA & RESEARCH PROGRAMMES

Dutch Research Council (NWO) Consortium PRELIFE – Pathways, Reactions, and Environments leading to LIFE, Co-I — 11/24–

ESA PLATO Consortium, member of Exoplanet Science WPs *Atmospheres of PLATO Terrestrial Planets* (WP116400) and *Climate/Atmospheres of PLATO Habitable Zone Planets* (WP116530); Core Science Team member since 2025 — 12/21–

Co-I (since 2024, previously associate member) of Carnegie-led research program *AEThER: Atmospheric Empirical, Theoretical, and Experimental Research* — 09/21–

Associate member of NASA research program Alien Earths: Searching for Habitable Worlds in Nearby Planetary Systems — 03/21–

Co-lead of the *Science Team* of the LIFE Collaboration — 02/21–01/26

Member of the *Quantifying Habitability* working group of NASA's Nexus for Exoplanet System Science — 09/20–

ESA Ariel Consortium, member of the *Exoplanetary Interiors* working group — 04/20–

Postdoctoral Fellow of the Simons Collaboration on the Origins of Life (SCOL project) — 10/19–09/22

Member of the Large Interferometer for Exoplanets (LIFE) Collaboration — 01/19–

Conference & Workshop Organisation

30 events in total, incl. 8 as main organiser

Rocky Worlds Conference Series (main organiser) — Chair 10/22–

Rocky Worlds 5, Berlin, DE — SOC 04/28

Lorentz Center Workshop *Characterizing Habitable Exoplanets With Interdisciplinary Expertise*, Leiden, NL — SOC 04/26

Rocky Worlds IV (main organiser), Groningen, NL — Chair 01/26

Science and Technology for the Era of LIFE, Barcelona, ES — SOC 11/25

Lorentz Center Workshop *Atmospheric and interior evolution of planetary magma oceans* (main organiser), Leiden, NL — Chair 10/25

Exoclimes VII, Montréal, CA — SOC 07/25

Exoplanets V, Leiden, NL — Convenor 06/24

Rocky Worlds III, ETH Zurich, CH — SOC 01/24

Annual LIFE Science Team Workshop, Berlin, DE — Co-Chair 09/23

Goldschmidt 2023, *Unraveling planetary interiors with extraterrestrial samples and space data*, Lyon, FR — Convenor 07/23

Origins of Solar Systems Gordon Research Seminar (main organiser), South Hadley, US — Co-Chair 06/23

The (geo)chemistry of terrestrial planet formation, Groningen, NL — SOC & LOC 03/23

Rocky Worlds Discussions, monthly virtual seminar series (main organiser) — SOC 10/22–09/24

Rocky Worlds II (main organiser), University of Oxford, UK — Chair 07/22

LIFE Science Team meetings, monthly virtual team meeting, co-host — 03/22–01/26

AGU 2021 session *Multidisciplinary perspectives on the formation and early evolution of terrestrial worlds*, New Orleans, US — Convenor 12/21

ESA PLATO Exoplanet Atmospheres Workshop, Berlin, DE	SOC	12/21
Lorentz Center Workshop *LIFE – Large Interferometer for Exoplanets* (main organiser), Leiden, NL	SOC	06/21
AGU 2020 session *Accretion and differentiation of rocky planets: perspectives from geophysics, geochemistry, & astronomy*, San Francisco, US	Convenor	12/20
LIFE Workshop III, Liège, BE	SOC	12/20
Threats from the surroundings, ESO, Garching, DE	SOC	11/20
Exoplanets III, Heidelberg, DE	Moderator	07/20
LIFE – Large Interferometer for Exoplanets (main organiser), virtual, ETH Zurich	SOC	05/20
3rd Oxford Meeting on Planets (main organiser), University of Oxford, UK	SOC	12/19
Exoclimes V, University of Oxford, UK	LOC	08/19
2nd Oxford Meeting on Planets (main organiser), University of Oxford, UK	Chair	12/18
Water during planet formation and evolution, University of Zurich, CH	SOC	02/18
The Origins of Volatiles in Habitable Planets, University of Michigan, US	LOC	10/17
Water during planet formation and evolution, PlanetS internal workshop, University of Zurich, CH	SOC	11/16

Advanced Teaching & Research Training Courses

TEACHING, EDUCATION & SUPERVISION

Academic Leadership, University of Groningen, NL	09/25
University Teaching Qualification (UTQ), University of Groningen, NL	02/24
Introduction for new PhD supervisors, University of Groningen, NL	10/23
Active Bystander Training, Kapteyn Institute, NL	04/23
The importance of the first PhD year, University of Groningen, NL	03/23
Coaching PhD students, University of Groningen, NL	01/23
Inclusive Leadership: The Power of Workplace Diversity, University of Colorado, US (online)	06/21
University Teaching, University of Hong Kong, HK (online)	05/21
Researcher Management and Leadership Training, University of Colorado, US (online)	05/21
Learning to Teach, ETH Zurich, CH	12/15

RESEARCH SCHOOLS

Winter school *Chronology of the Formation of the Solar System VI*, Les Houches, FR	02/17
Winter school *Planetary Geodynamics*, TRR 170 Late Accretion onto Terrestrial Planets, Hodenhagen, DE	11/16
Winter school *From Protoplanetary Disks to Planet Formation*, 45th Saas-Fee Advanced Course, Les Diablerets, CH	03/15
Summer school *ISSAC 2013: Star & Planet Formation*, UC Santa Cruz, US	08/13

Outreach & Public Engagement

50+ outreach activities, incl. 14 media interviews & press features, 4 public talks & 2 panels, 16 blog posts & videos, 22 peer-reviewed Astrobites articles

MEDIA INTERVIEWS & PRESS

Media interview, *Astronomen ontdekken de eerste rotsachtige exoplaneet met een atmosfeer*, KIJK Magazine	07/26
Press coverage for Nicholls et al. Nature Astronomy 2026 on the molten sulfur world L 98-59 d, primary feature *Molten Sulfurous World Blurs Exoplanet Categories* (Sky & Telescope), also covered in ABC News, Space.com, University of Groningen news, and others	03/26
Media interview, *Stormy planets and an unexpected atmosphere*, FSE Science Newsroom, University of Groningen	12/25
Media interviews for NASA, Space.com, phys.org, ScienceDaily, and others on TOI-561 b atmosphere detection	11–12/25

Interview, *Quickfire Questions with Tim Lichtenberg*, Europlanet Magazine 09/25

Media interview, *This Blazing Exoplanet Breaks All the Rules about Alien Atmospheres*, Scientific American 09/25

Media interview, *Exoplanet plate tectonics: A new frontier in the hunt for alien life*, New Scientist 12/24

Media interview, podcast *Die knifflige Suche nach außerirdischem Leben*, Deutschlandfunk 12/24

Media interview, *What is a presumed sign of life doing on a dead comet?*, Science News 04/24

Biographical interview, *Welt der Physik*, Year of Science 2023, German Ministry for Science and Education 04/23

Media interview, *Planeet en ster groeien samen op*, New Scientist Netherlands 12/22

Press coverage for Bonsor+2023 *Nature Astronomy*, University of Groningen, ScienceDaily, and others 11/22

Press coverage for Lichtenberg+2021 *Science*, phys.org, ScienceDaily, UPI, SciTechDaily, and 36+ outlets 01/21

Press coverage for Lichtenberg+2019 *Nature Astronomy*, ETH Zurich, NCCR PlanetS, and 21+ outlets 02/19

PUBLIC TALKS & PANELS

Public talk *Formation and Evolution of Terrestrial Worlds*, DOT Planetarium Groningen 05/24

Public talk *Entstehung und Entwicklung terrestrischer Welten* (∼100 attendees), Max Planck Institute for Solar System Research, Göttingen, DE 05/24

Panel member, Golden Webinars in Astrophysics: Lynnae Quick, *Cryovolcanism on Ocean Worlds* 10/21

Panel member, Golden Webinars in Astrophysics: Frances Westall, *Biosignatures and the Search for Extraterrestrial Life* 10/21

Public talk *Wasser, Wüste, oder Lava: wie entstehen erdähnliche Planeten?*, Planetarium Göttingen, published on Urknall, Weltall und das Leben (>34'500 views) 11/20

Public talk *Distant worlds in the computer: planet formation via gravitational instabilities*, Göttingen University, DE 03/14

BLOG POSTS & VIDEOS

Blog articles and paper summary videos published on Medium/Forming Worlds, YouTube, and NCCR PlanetS.

Hidden water in magma ocean exoplanets (video) 10/21

The turbulent hearts of shrouded super-Earths (blog + video) 05/21

Early carbon depletion of terrestrial worlds from the outside-in (blog + video) 05/21

Molten exoplanets as a window into the earliest Earth (blog + video) 01/21

Formation of the Solar System in two steps (blog + video) 01/21

Entstehung des Sonnensystems in zwei Phasen, popular article in *Sterne und Weltraum* 08/21

Two emergent faces of rocky planetary systems (blog) 02/19

Planetesimal magmatism as a key to the chemical assembly of terrestrial planets (blog) 01/19

Spotting protoplanet collision afterglows in the stellar neighbourhood (blog) 11/18

Impact splash chondrule formation during planetesimal recycling (blog) 11/17

Supernova ejecta polluting young planetary systems (blog) 08/16

On the variety of asteroid interiors (blog) 04/16

Author and referee for Astrobites, a graduate student-run blog introducing undergraduates to astrophysical research (22 peer-reviewed articles, >13'000 views; 24 reviews; application committee 2015, 2016) 09/14–08/19

Why open research practices are a clever move 12/16

Modest chaos in the early solar system 11/16

Driving planetary dynamos by giant impacts 08/16

Water worlds – self-arrests, thermostats and long-term climate stability 07/16

Massive circumstellar disks accrete faster than low-mass ones 05/16

Grand fireworks from the Local Super-Bubble 04/16

Bridging the gap: asteroid collisions without quantum foam 03/16

The tempestuous adolescence of circumstellar disks	02/16
Sustainable climates on greenhouse super-Earths?	11/15
Ripping apart asteroids to account for Earth's strangeness	11/15
Dry out super-Earths via giant impacts	10/15
Triggered fragmentation in self-gravitating disks	09/15
Giant planets from far out there	08/15
Nature's Starships Vol. II – A Hitchhiker's Guide to the Bloody Cold Beginnings	07/15
Nature's Starships Vol. I – Ride in on Shooting Stars	06/15
Circumplanetary disks… soon!	05/15
Hot Shots: How to trigger star formation in the early Universe by supernova blast-waves	05/15
Why is star formation so inefficient?	04/15
Are extrasolar worlds more likely to be water-rich?	03/15
Sneak a peek on the cause of death of protoplanetary disks	02/15
Are carbon-rich planets just an observational bias?	01/15
Orderly disorder: simulations of planet-disk dynamics with AREPO	12/14

OTHER ACTIVITIES

Letters to a Pre-Scientist pen pal	2019–2020
Expedition Solar System, Focus Terra science exhibition, ETH Zurich	2018–2019
Figures and media for popular science article *Exotische Welten* in *Sterne und Weltraum*	08/15
Zurich Scientifica 2015, *Licht und Astronomie*, public science exhibition, ETH Zurich	09/15
Astrobites reddit Ask-Me-Anything	06/15
Q&A visit, primary school, Zurich Seefeld	06/15
3D rendering video for Bovino et al. (2014), ApJL 790, L35 (phys.org, INAF, HPC Wire)	07/14
